Getting To Know Us . . .

As GROWERS and PROPAGATORS of PERENNIALS EXCLUSIVELY, we are ever on the alert for new plants. Each year a great deal of time, effort and money is spent in locating and testing new items to offer YOU. While we do have a LARGE SELECTION now, our aim is to keep presenting even more of the NEWER and BETTER PERENNIALS each year.

SUCCESS in the CONTROL of NEMATODES at our nursery for the past three years has produced amazing results. Not only do we treat our potting soil with DOW MC-2, but use DOW TELONE on our entire acreage as well.

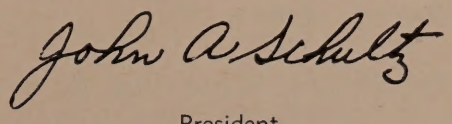
SPRAYING has become a "must" in the nursery business. Since ours is no exception, we have set up a strict spraying schedule, using both FUNGICIDES and INSECTICIDES in our fields.

PORTABLE IRRIGATION keeps our total acreage of plants growing during the hot dry summer months. This also enables us to grow many varieties which would be almost impossible to grow without sufficient water.

GRADING STANDARDS are STRICT. When you order 100 plants, you get 100 PREMIUM GRADE plants, not 90 good and 10 inferior ones, but all up to YOUR own EXACTING STANDARDS. With the exception of a few plants which are better moved in pots, our material is all STRONG FIELD STOCK and NOT bedded material.

PACKING METHODS are backed with years of "know-how" by our packers. Each has no less than 20 years of nursery experience behind him. Perennials are not shipped in plastic bags because we feel it is not in the best interest of the customer. SPAGHNUM MOSS and EXCELSIOR is used exclusively with NEWSPAPER PARTITIONS between the different varieties. Each variety plant is labeled. For shipping, they are placed in pasteboard boxes or wire bound crates, all of special construction which permits the perennials to breathe enroute.

NURSERY LOCATION along the shores of Lake Erie (where we have such excellent long growing seasons) makes it possible for us to present the BEST PERENNIALS grown anywhere in the United States. SPRINGBROOK GARDENS welcomes you to make it a point to stop in and visit our nursery at any time and see for yourself why our list of satisfied customers is growing each year.



President

ACHILLEA

(Milfoil : Yarrow)

Excellent cut flower and border plant with attractive fern-like foliage. Aromatic odor. Sun.

Angel's Breath. Double white. July-August 24"

HEATHS and HEATHERS

(Erica) **(Calluna)**

Rare, low growing evergreen shrubs where a balanced collection offers either winter color or summer show. Plant 1½ to 2' apart, in well drained slightly acid soil. Sun or light shade. Should be pruned after flowering to keep them compact. Cut flowers will last for weeks. Use in rock gardens, foreground of foundation plantings, planter boxes, patio edgings, perfect as ground cover in sandy areas where grass will not thrive.

(Heaths and Heathers) Continued on next page

HEATHS and HEATHERS — cont'd.

Perennial Hints

To avoid repitition in the catalog, we suggest here, a common sense rule on soil for perennial plantings. Use well drained soil, rich in **Potash** and **Phosphorous** (for root and stalk development) and moderately rich in **Nitrogen** (to assure flowers, rather than over-developed leaves and stems).

With imagination, most everything in our catalog can be planted in the **Perennial Border** as long as rules of likes and dislikes of the plants are observed.

FALL PLANTING is recommended only when planted early enough for the plant to become established. September 15th to October 15th is the ideal time for fall planting. To avoid heaving during winter a **porous mulch** should be used, such as soybean straw, pine needles or any coarse mulch which does not pack down or become soggy. **Air must circulate.** A mulch is used not to keep the plant from freezing, but to keep the already frozen plant from constantly freezing and thawing. The listed items are better planted in the fall: ACONITUM, POPPY, PEONY, HELLEBORUS, CIMICIFUGA and MERTENSIA.

SPRING PLANTING should be made as soon as possible in the spring. Your planting should be completed by the first of May. The following items are better planted in the spring: JAPANESE ANEMONE, FUSCHIA, HELIANTHEMUM, NIEREMBERGIA, PENTSTEMON Firebird, PENTSTEMON Garnet, TRITOMA, LITHOSPERMUM, GEUM, CHRYSANTHEMUMS.

OFFICE LOCATED AT THE NURSERY ON HEISLEY ROAD JUST ¼ MILE NORTH OF ROUTE 20.
